BABCOCK DELIGHTED TO SUPPORT RAF100 APPEAL

Babcock, the leading engineering support services company, is delighted to sponsor the RAF100 Appeal to celebrate 100 years of the RAF in 2018. Babcock has enjoyed a partnership with the RAF for almost as long as it has been in existence.

Roger Hardy, Chief Executive of Babcock's Aviation sector, said: "The long history between Babcock and the RAF can be seen in our shared focus on young people and STEM education, dedication to our serving military personnel and an unwavering commitment to the delivery of air power. I am delighted we are able to support the RAF100 Appeal celebrations and look forward to the wonderful programme of events planned. Whilst we must remember the heroism and achievements of the past 100 years we are equally keen to contribute to the strong legacy that RAF100 will surely provide."

Simon Collins, Chairman of the RAF100 Appeal stated: "The RAF100 Appeal is delighted to welcome Babcock as a Headline sponsor to support the charitable aims of the RAF100 Appeal and help celebrate the RAF's Centenary. The RAF and the four major RAF charities are combining as one for this unique moment in history to commemorate the past 100 years since the formation of the RAF and look forward with confidence to a future of hope and opportunity for the entire RAF family."

At Babcock we are trusted to deliver world-class people, engineering and technical support to further aviation excellence across the UK defence air environment. For over 100 years, our commitment to military aviation has empowered us to develop a level of expertise that is unrivalled in the sector.

Notes to Editor:

For more than a century, Babcock has been trusted to deliver bespoke, highly-skilled engineering services. We help customers in the UK and around the world to improve the capability, reliability and availability of their most critical assets within the four market sectors of Marine, Land, Aviation, and Nuclear, underpinned by a deep understanding of technology integration, unique infrastructure, and specialist training.
